

Clay Robbins

Built in the shop. Headed to the field.

Cal Poly CM student with four years in the shop and a summer of field engineering on a Bay Area parking structure. Plan-literate and comfortable on a live site.

EXPERIENCE

Where I've put hands on the work.

Field Engineer Intern

SUMMER 2026

Level 10 Construction • San Jose, CA • 1,280-stall garage, abatement & demo

- Created the site logistics plan and haul routes for demolition of three high-rises covering 75% of a downtown San Jose city block.
- Ran QA/QC on 30+ rebar details through foundation and slab pours, checking placement against approved shop drawings ahead of inspection.
- Tracked and labeled 1,000+ embeds from delivery to installation, keeping the placement log current for every pour.
- Mapped 30+ overhead utilities across several thousand SF of below-grade structure to scope pre-demolition air gaps and shut-offs.
- Walked the site daily with the superintendent, logging schedule duration changes and flagging conflicts before they hit the critical path.
- Wrote daily reports and photo logs and moved RFIs and submittals between the field and the office.

Technician / Fabricator

FEB 2023 – PRESENT

Nelson's Garage • Cayucos, CA • Restoration and custom fabrication

- Led the full custom build of a 1986 Ford Bronco — suspension and brakes through fitting a \$30,000 modern engine and transmission package.
- Led frame-off restorations valued over \$100K — sequenced the work, ran parts takeoffs and ordering, and managed fitment from teardown through paint.
- Fabricate to print and to spec: MIG/TIG welding, tube and plate work, exhaust builds, and body work, designing in Fusion 360 and cutting it right the first time.
- Rebuild differentials and transfer cases and run custom wiring on high-dollar vehicles the shop trusts to few people.
- Diagnose problems with no manual to follow — the same instinct a CM needs when a field condition does not match the plan.
- Advanced from new hire to a lead role on the shop's highest-value work.

INVOLVEMENT & LEADERSHIP

- Cal Poly Roller Hockey Club PLAYER • 2025 – PRESENT
- SLO Bike Kitchen VOLUNTEER MECHANIC • 2022 – 2024

EDUCATION

Cal Poly, San Luis Obispo

B.S. Construction Management

GPA 3.93

MAY 2027

Cuesta College

Transfer Coursework

GPA 3.90

2023 – 2025

CERTIFICATIONS

- Procure Certified: PM — 2026
Financial Mgmt
- OSHA 30-Hour IN PROG
Construction

SKILLS

SOFTWARE & TOOLS

Bluebeam Revu • Procure • Revit • AutoCAD • Fusion 360 • MS Project • Excel

PROJECT & FIELD

Plan reading • Takeoffs • Estimating • Scheduling • RFIs • Submittals • Daily reports • QA/QC • Punch lists

TRADE & HANDS-ON

MIG/TIG welding • Steel & tube fab • Body work • Custom wiring • Carpentry & framing • Survey
